### DETAILED ACTION

I. Rejection of claims 17,21,23,30,33 under 35 USC 103(a) as being obvious over Hirashima et al will be maintained in light of amendment filed 3/29/06 for reason on record and as follows. Arguments presented by Applicant are unpersuasive.

A. Applicant argues:

1. Instant encasement coat comprises at the high ends 50% polymer (ethylcellulose) and 40 % PEG; whereas, Hirashima teaching is an encasement coating comprising 60 % ethyl cellulose and 30 % PEG.
2. It would not be obvious to conclude that the coat of Hirashima would be non-permeable and soluble in a pH of above about 5.0. In fact Hirashima would be permeable and would not be soluble at any pH.

B. Examiner argues:

1. The amounts of PEG and ethylcellulose in Hirashima and instant invention differ only by 10% of each. Applicant does not provide a showing that the 10% difference would materially impact the invention. For this reason, the rejection of record is maintained.
2. Applicant makes statement to the coat of Hirashima being permeable and insoluble at any pH. However, Applicant does not provide data showing that the 10 % difference in both the

Art Unit: 1616

ethylcellulose and PEG would make the coat permeable and insoluble at any pH.

II. New Rejection under – 35 USC 112, 1<sup>st</sup> paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,6-9,11,15,16,22,24-29,34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Invention is to the encasement of a pharmaceutical formulation as a tablet, capsule, or pellet comprising active, compression aid and extrusion aid. The claims are to formulation comprising active in form of a capsule, tablet, or pellet wherein the encasement is for the active. The new material is the original claims are to the encasement of the active rather than to the encasement of the active formulated as a capsule as in amended claims.

III. Claims 31,32 are allowable. The prior art does not teach or suggest the invention wherein a capsule, tablet or pellet comprising active, compression aid and extrusion aid is surrounded by a composition comprising polymer and PEG.
